

Running, Shifting and Positioning Tools

5 Type C-1 Running Tool

Type C-1 Running Tool is used to run and land flow control devices with external fish necks. For applications which do not require a No-Go type running tool the C1 Type Running Tool can be dressed with a Thread Protector which has the same o.d. as the body of the tool. Additionally by adding

the required size Locating Ring, the tool can be converted into a No-Go type running tool, providing a positive tool positioner with its No-Go feature. The Type C-1 Running Tool has a box down connection to accept 'A' and 'N-1' type shanks.

Available tool sizes as shown. Please contact our sales office for further enquiries.

Nominal Size	Tools O.D.	Fishneck O.D.	Prong Thread	Top Connection
2"	1.406"	1.187"	5/8"-11UN	15/16"-10UN
2 3/8"	1.718"	1.375"	3/4"-16UN	15/16"-10UN
