

WELL COMPLETION TOOLS

STSB MECHANICAL SETTING TOOL

Model STSB Mechanical Setting Tools are used to mechanically set STMB Bridge Plugs. It is designed to contain the upper slips of Bridge Plug in a safe retracted position while running to setting depth. The upper slips are released by right hand rotation and slacking off on the workstring.

Features:

- Specially designed Bow Spring provides positive control and allows one size Mechanical Setting Tools to cover a large range of casing weight
- Locked with Bridge Plug
- The Upper slips are held in a safe retracted position while running
- Can quickly be configured to set STMR Cement Retainers
