

## STTC TUBING CENTRALIZER

Model STTC Tubing Centralizer is used to center the tubing and provide for easier entry into an STWR Cement retainer previously set by wireline.

### Features:

- Provides positive control and allows one size Tubing centralizer to cover a large range of casing weights
- Most parts are common to the STSR Mechanical Setting Tool
- Allows tubing torque to be transmitted to tools below

HT CO<sub>2</sub> H<sub>2</sub>S
